

# Class 3 IFT-Paramedic Treatment Protocol 3602

**Antibiotic**

**Page 1 of 1**

**Any antibiotic must have been infusing for at least 15 minutes prior to transport and determination made that patient is not experiencing an allergic reaction to the medication.**

A. Perform **Class 3 IFTA Protocol 9204**. Perform **Inter-Facility Transport Assessment (IFTA) Procedures Patient Care Protocol 9204** and follow the proper protocol for medical management based on clinical presentation.

B. Treatment:

1. Continue infusion rates as **set by the sending physician**.

C. Monitor patient for symptoms of an allergic reaction: rash, hives, dyspnea, itching, and/or tachycardia.

D. If symptoms occur, stop the infusions, refer to **Allergic Reaction/Anaphylaxis Protocol 4501** and **consult MCP** for further orders.
